

INSTRUCTIONS FOR POSTER PRESENTATION

Your poster board will be marked with the Poster Number indicated in your notification letter received by email. Please note that the first number indicates the day when you have to be present at your poster board (ex. P1 will be Thursday, 22 September, P2 Friday, 23 September and P3 Saturday, 24 September), the number after the dash is the abstract number.

Mounting and dismounting of posters to be presented on Wednesday, 21 September (P1):

Posters need to be mounted on:

Wednesday, 21 September between 07.00-08.30

Poster need to be removed on:

Wednesday, 21 September between 17.30-18.00

Mounting and dismounting of posters to be presented on Thursday, 22 September (P2):

Posters need to be mounted on:

Thursday, 22 September between 07.00-08.30

Poster need to be removed on:

Thursday, 22 September between 17.30-18.00

Mounting and dismounting of posters to be presented on Friday, 23 and Saturday 24 September (P3):

Posters need to be mounted on:

Friday, 23 September between 07.00-08.30

Poster need to be removed on:

Saturday, 24 September between 14.00-15.00

When you remove your poster, please make sure to remove all poster-mounting materials from the board. **The meeting staff will remove posters not taken down on time and the meeting Organisers cannot ensure any further responsibility for the material.**

The maximum size of your poster should be **150 cm height and 90 cm width**. Your poster number will be displayed with large printed figures in the upper corner of the poster board. Your poster material should be attached on the surface by material provided by the meeting staff.

Give a short and comprehensive review of the basic items of your study. This can be done by dividing your text into several but clearly delineated paragraphs and sections such as Introduction or Aim of, Study, Materials and Methods, Result, Conclusions. Remember that it is easy to start reading a paragraph of six lines and that most people avoid one with 30! Your poster text should be enlarged so that it can be read at a distance of about one meter.

Drawings, diagrams and photos are extremely helpful and often necessary to display results and conclusions. Make sure that your illustrations are easy to understand; do not overload any chart or drawing with information.
